COMPANY PROFILE

JKBMS ELECTRONIC TECHNOLOGY CO., LTD.

FOCUS ON POWER BMS DEVELOPMENT

JKBMS Electronic Technology Co., Ltd. is a research and development enterprise focusing on BMS management system for power batteries. As the "Leader of Active Battery Balance Technology", JKBMS Electronic Technology Co., Ltd. controls the four core technologies of the world's leading power battery management system: Active Balance, Wireless Communication, Functional Safety, Capacity Management. Kelvin Technology upholds the business concept of "Pursue the ultimate products, help the environmental cause, harvest the beautiful sky", composing a new chapter in the electric vehicle industry to contribute its own strength to the environmental cause!

MAIN PRODUCTS

Smart Active Balance BMS

COMPANY INTRODUCTION

Business philosophy

Growing with Strugglers

We focus on R&D investment (R&D input is not less than 10% of sales revenue) to keep ahead of technology, become the leader of battery management programs for domestic electric vehicles, and gradually move to the international market

Jkbms values partners

We are willing to join hands with partners with common goals

Create the future and achieve win-win results!

Master the four core technologies of the world's leading power battery management system

SAMRT ACTIVE BALANCE BMS

Jkbms is a management system tailored for large capacity series lithium battery pack. It has functions such as voltage collection, active balance of large current, overcharge overcurrent overtemperature protection, coulometer, Bluetooth communication, GPS remote, etc. It is suitable for lithium iron phosphate, lithium ternary and other battery types. The protective panel relies on the energy transfer active equalization technology with independent intellectual property rights to achieve a maximum sustained 2A balanced current. The Intelligent Protection Panel for Extreme Empty Lithium Battery is a management system tailored for large capacity series Lithium Battery Pack. It has the functions of voltage collection, active balance of large current, overcharge and overcurrent overtemperature protection, Coulometer, Bluetooth communication, GPS remote and so on. It is suitable for lithium iron phosphate, lithium ternary and other battery types. The protective panel relies on the energy transfer active equalization technology with independent intellectual property rights to achieve a maximum sustained 2A balanced current.

ELECTRIC MOTORCYCLE VERSION

PRODUCT FEATURES

- The two-way lossless active balance function improves the battery efficiency by 95%.
- Can be used for lithium ternary(Li-ion), LTO, Lifepo4 ,lithium manganate, lithium cobalt....battery packs
- Protective functions such as over-charging, over-discharge, over-current, short circuit, etc.
- Separate battery collection range 1V~5V, accuracy (+) 5mV
- Standardized Bluetooth communication reserved GPS/RS485/CAN communication interface
- size: 110*73*18mm/136*83*17.6mm

APPLICABLE WORKING CONDITIONS

- Operating temperature range: -20°C-70°C
- Power requirements: 20V-100V
- power dissipation:
Balance state: 10mA@100V,
Unbalanced state: 6mA@100V

JK-B2A25S-RP (RELAY Scheme)

PRODUCT FEATURES

- Suitable for 3s~25S of large capacity lithium cobalt, lithium manganate, Li-ion, Lifepo4, LTO battery packs; Continuous operating current up to 600A
- Applicable to small sightseeing cars, walkers, fork-lifts, shared cars, great work Battery packs for rate storage, base station backup power, solar power, etc.

WORKING CONDITIONS

- Operating Temperature Range: -20 C-70 C
- Power Supply: 30V-100V
- Power consumption: maximum power consumption 1W, power off 0.2mW

ACTIVE BALANCE * BEST FOR YOUR BATTERY

HOW TO PROTECT YOUR BATTERY BETTER?

FULL-TIME AUTOMATIC DETECTION AND REPAIR OF BATTERY DIFFERENTIAL PRESSURE, EFFECTIVELY EXTENDING BATTERY LIFE

BRIEF INTRODUCTION TO ACTIVE EQUILIBRIUM

The active balancer is a balancing management system tailored for large capacity series battery packs. The balancer uses the supercapacitor as the medium to achieve active energy transfer equalization. The maximum balance current of the balancer is 2A, and the balance current does not depend on the voltage difference of the battery pack.

The active balancer has Bluetooth communication function and is supported by mobile APP software. You can connect the balancer via Bluetooth on your mobile phone to view the battery voltage, balance status, modify parameters, and so on. The balancer is small and easy to install. It can be widely used in the battery PACK of small sightseeing cars, walkers, shared cars, high-power storage, base station backup power, solar power stations and other products. It can also be used in battery balanced maintenance, repair and other occasions.

MODEL ESTABLISHMENT

JK-DZ08 B1A 24S

COMMUNICATION PORT CODE: BLUETOOTH COMMUNICATION: NO RS485 COMMUNICATION: DZ11 CAN COMMUNICATION: DZ08

EQUALIZING CURRENT IDENTIFICATION, USING A COMBINATION OF LETTERS AND NUMBERS; FOR EXAMPLE, B1A REPRESENTS 1A EQUALIZING CURRENT, B10A REPRESENTS 10A EQUALIZING CURRENT

APPLICABLE PEOPLE

LITHIUM BATTERY USERS

- ◆ The battery is powered off when used
- ◆ Always feeling that the battery is not fully charged
- ◆ Battery life after a period of use Not as good as before

REPAIR PERSONNEL

- ◆ Maintenance requires disassembling, sorting, and reassembling the entire set of batteries, which is too cumbersome and time-consuming
- ◆ Disassembling the electrical core for capacitance separation requires more expensive and time-consuming equipment
- ◆ Using commercially available balance charging and repair Didn't use it a few times, and it didn't work anymore

BATTERY PACK FACTORY

- ◆ Too many after-sales batteries, traditional maintenance Method time can't afford to wait
- ◆ Too many after-sales batteries, and the labor cost of traditional maintenance methods is too high
- ◆ Traditional maintenance methods, repair accuracy Not high, poor customer

ACTIVE BALANCER

(STANDARD EDITION)

PRODUCT FEATURES

- NON ENERGY CONSUMPTION ENERGY TRANSFER ACTIVE BALANCING TECHNOLOGY.
 - AUTOMATIC EQUALIZATION WHEN THE PRESSURE DIFFERENCE EXCEEDS THE TRIGGER VALUE (DEFAULT>4MV, SETTABLE)
 - WITH ANTI BACKCONNECT PROTECTION FUNCTION, BATTERIES ABOVE 24S CAN SUPPORT BALANCED CASCADE SINGLE BATTERY ACQUISITION RANGE: 1V~5V, ACCURACY: ± 5MV
 - STANDARD BLUETOOTH COMMUNICATION, SUPPORTING REAL-TIME VIEWING OF BATTERY STATUS BY ANDROID AND IOS
- OUTLINE DIMENSION: 153MM * 136MM * 17.6MM

APPLICABLE WORKING CONDITIONS

- OPERATING TEMPERATURE RANGE: - 20 °C - 70 °C
- POWER REQUIREMENTS: 40V-100V, BATTERY PACK SELF POWERED OR EXTERNAL POWER SUPPLY
- POWER CONSUMPTION: BALANCED STATE 10MA@100V , UNBALANCED STATE 6MA@100V

JK Smart Active Balancer

Lithium Battery Differential Pressure Repair Instrument

All troubles solved together

5A Smart Active Balancer

Main Technical Indicators

- ◆ Supports 4S-24S battery packs.
- ◆ Real-time active energy transfer balancing, when the balance is reached, the pressure difference between single batteries is less than 5 mV;
- ◆ The voltage range of the monomer is 1V~5V, and the precision is +5mV.
- ◆ Supports all battery types such as li-ion, lead acid, Lifepo4, supercapacitor, etc.
- ◆ The balanced current is set independently in the range of 0.8A to 5A, independent of the cell pressure difference.
- ◆ Supports balanced cascade for more than 24 battery packs, which can theoretically be cascaded indefinitely.
- ◆ Bluetooth communication, with mobile APP, support Android and IOS, real-time view of the status of the battery.
- ◆ Balanced line resistance detection, early detection of wiring errors.
- ◆ Operating temperature range: -20 C to 70 C.
- ◆ Power requirements: 12V~100V, self-powered by batteries.
- ◆ Power consumption: balanced state 10mA@100V ;Unbalanced state 6mA@100V .

10A Smart Active Balancer

Main Technical Indicators

- ◆ Supports 12S-24S battery packs.
- ◆ Real-time active energy transfer balancing, when the balance is reached, the pressure difference between single batteries is less than 5 mV;
- ◆ The voltage range of the monomer is 1V~5V, and the precision is +5mV.
- ◆ Supports all battery types such as li-ion, lead acid, Lifepo4, supercapacitor, etc.
- ◆ The balanced current is set independently in the range of 0.8A to 10A, independent of the cell pressure difference.
- ◆ Supports balanced cascade for more than 24 battery packs, which can theoretically be cascaded indefinitely.
- ◆ Bluetooth communication, with mobile APP, support Android and IOS, real-time view of the status of the battery.
- ◆ Balanced line resistance detection, early detection of wiring errors.
- ◆ Operating temperature range: -20 C to 70 C.
- ◆ Power requirements: 40V~100V, self-powered by batteries.
- ◆ Power consumption: balanced state 10mA@100V ;Unbalanced state 6mA@100V .
